

Determining the size of coronal bright points using cross-correlation techniques and data from *AIA/SDO*

Laurel Farris, R. T. James McAteer

1. Introduction

Coronal BPs are seen ubiquitously in the solar atmosphere at several EUV and X-ray bandpasses.

2. Data

Here is my data.

3. Cross-correlation

Text.

4. Results

Here are my results. Here are my results. Here are my results. Here are my results. Here are my results. Here are my results.
